DSBDA PRACTICAL DEPENDENCIES

Their mean thing save your file in only C drive and if they show the choose the python interpreter

C:\Users\YourName\AppData\Local\Programs\Python\Python311\python.exe

This is the path of Look like this is very important so if the path is wrong the practical is not run so care full

And this applicable for all practical For only VS code not for Jupyter notebook

Practical 1 VS code Download Dependencies

Run this command on terminal

pip3 install pandas numpy scikit-learn

Practical 2 VS code Download Dependencies

pip install seaborn

pip install matplotlib

Practical 8 VS code Download Dependencies

C:\DSBDA Practical\Data Analytics 2 p8

In practical Data Analytics 2 please save folder on the shown above if the path change the practical is not run

Practical 9 VS code Download Dependencies

C:\DSBDA Practical\Data Analytics 3 p9

Same for also this practical save folder shown above path

Practical 10 VS code Download Dependencies

pip install nltk

ok this all the dependencies or library's mostly used and on other practical they run directly. if any chance error occurred so used pip install and which library you want to install that name in the cmd or terminal in VS code used for downloading dependencies.

or I am not did practical 11 , 12, 13, because the practical is very hard and they all Hadoop and java practical so I am not did that practical if in the practical exam you get practical 11 , 12, 13 if any one of them on in your sheet so change that practical without think anything.
